

Company Overview

Insider Technologies Limited

Service Management Specialists

Insider Technologies is a UK-based software and services company quality certificated to ISO 9001:2000 and TickIT, supplying over 400 blue chip accounts worldwide.

What we do is help our clients to manage complex application environments. These include:

- **HP NonStop systems** – mainly in the finance (retail, corporate and central banking) and telecommunications sectors. Reflex 80:20 is the premier high-end service management environment and combines application, system and service management technologies; together with the NonStop world's leading batch environment.
- **Unified Messaging Management** – for large corporates, ISPs, military and government electronic messaging centres. Our SENTRA suite is NT hosted and is used in some of the most demanding and service driven commercial, military and government applications.
- **Tracking systems** – designed to follow the lifecycle of complex transactions, reporting on the state of the individual message or transaction and the overall health of the processes and components through which such transactions flow. Capital Tracks™ is a special version of this package designed to provide a unified view of banking and FX transactions flowing through an investment bank's systems.
- **BASE24™ and ATLAS™ specialists** – our management technology and application management services have been integrated deeply into these key packages and Insider has a close relationship with both ACI Worldwide and MPCT.
- **Managed Services** - Insider Technologies is a founding partner of Insula International, which operates remote monitoring, automated service bridges and fully-outsourced management of specific application environments.

Insider Technologies hosts its applications on **HP NonStop** and **NT platforms**, with agents for **Unix**, **Linux** and **VAX** environments.

Insider Technologies has 40 staff, is a private independent company with no institutional equity. Insider has operated profitably since its inception in 1989.
